

Global Institute for  
Structure relevance,  
Anonymity and  
Decentralisation i.G.

**GISAD statement on** [https://ec.europa.eu/info/law/better-regulation/have-your-say/initiatives/13208-Digital-skills-improving-their-provision\\_en](https://ec.europa.eu/info/law/better-regulation/have-your-say/initiatives/13208-Digital-skills-improving-their-provision_en) .

GISAD (Global Institute for Structure Relevance, Anonymity and Decentralisation i.G.) is an institute in the process of being founded. GISAD wants to develop a digital system (EU-D-S) from the point of view of Europe's citizens, which can hold its own in system competition with gatekeepers and a social credit system.

The aim of GISAD is to support the creation of a holistic Marshall Plan, as called for by the President of the European Commission, Ursula von der Leyen. The core of the Marshall Plan must be a digital concept adapted to civil rights and diversity. If individual measures are taken without their own overall system, Europe runs the risk of losing the system competition against other economic areas such as a centrally controlled China.

- GISAD's opinion is subject to the proviso that it is to be understood as part of an overall digital concept (multiple use of the same infrastructure without additional costs).

GISAD has defined three goals on which a Marshall Plan should focus:

1. The optimal refinement and simple utilisation of digital data, while preserving diversity and involving all those involved in value creation in a performance-based manner.
2. The stigma-free, lifelong digital inclusion of all citizens with incentives for self-development.
3. The digital guarantee of the necessary state tasks to maintain security for citizens, the economy and the state, while preserving pre-digital democratic achievements.

### Challenges:

GISAD welcomes the EU Commission's initiative to improve digital skills provision. It is important to proactively shape a digital democratic society with the many EU initiatives. In the context of the need for a Marshall Plan defined by GISAD, reference should be made to the comments already made.

**Against this background, GISAD proposes the following measures:**

- Creation of a stigma-free learning environment, i.e. anonymous in the Wide Area Network, from kindergarten to old age.
- Promote data refinement approaches that add value to the EU and drive engagement with a specific content area,
- Promote youth and adult (re)orientation concepts in the same or another language within a globally standardised category, see <https://gisad.eu/head-of-department-categorisation-semantic/>,
- Promoting permanent integration into the labour market, even in the case of short-time work or unemployment, through activities and skills based on the refinement of data, supported by a digital citizen's income, see <https://gisad.eu/digital-buergergeld-und-eu-d-s-zwei-die-zusammengehoren/>.
